

Requirement ID	Module	Description	Priority	Requirement Type	Status	Remarks
R001	Category	The system shall allow users to create a new category	High	Functional	Implemented	
R002	Category	The system shall require a category name during category creation	High	Functional	Implemented	
R003	Category	The system shall allow users to select one of the category type - Income/Expense	High	Functional	Implemented	
R004	Category	The system shall save category when all mandatory fields pass validation.	High	Functional	Implemented	
R005	Category	The system shall display all saved categories in the category list screen	High	Functional	Implemented	
R006	Category	The system shall allow users to delete an existing category	High	Functional	Implemented	
R007	Category	The system shall retain category information after application restart	High	Functional	Implemented	
R008	Transaction	The system shall allow users to create a new transaction	High	Functional	Implemented	
R009	Transaction	The system shall allow users to enter a purpose for a transaction	High	Functional	Implemented	
R010	Transaction	The system shall require a transaction amount before saving a transaction	High	Functional	Implemented	
R011	Transaction	The system shall allow users to select a transaction date	High	Functional	Implemented	
R012	Transaction	The system shall allow users to select either Income or Expense	High	Functional	Implemented	
R013	Transaction	The system shall allow users to select an existing category while creating a transaction.	High	Functional	Implemented	
R014	Transaction	The system shall save a transaction when all mandatory fields pass validation.	High	Functional	Implemented	
R015	Transaction	The system shall display all saved transactions in the transaction list.	High	Functional	Implemented	
R016	Transaction	The system shall allow users to delete an existing transaction.	High	Functional	Implemented	
R017	Transaction	The system shall retain transaction information after application restart.	High	Functional	Implemented	
R018	Transaction	The system shall display transactions in descending order based on transaction date.	Medium	Functional	Implemented	
R019	Transaction	The system shall display the transaction date in the transaction list.	Medium	Functional	Implemented	
R020	Transaction	The system shall calculate the total balance using the formula: Balance = Total Income – Total Expense	High	Functional	Implemented	

R021	Transaction	The system shall display the calculated balance in the transaction listing screen.	High	Functional	Implemented	
R022	Transaction	The system shall update the displayed balance whenever a transaction is added or deleted.	High	Functional	Implemented	
R023	Category	The system shall not allow a category to be saved when the category name field is empty.	High	Validation	Implemented	
R024	Transaction	The system shall not allow a transaction to be saved when the amount field is empty.	High	Validation	Implemented	
R025	UI	The system shall display appropriate validation messages when user input fails validation.	Medium	Validation	Implemented	
R026	UI	The system shall display income categories and transactions with a green visual indicator.	Low	UI	Implemented	
R027	UI	The system shall display expense categories and transactions with a red visual indicator.	Low	UI	Implemented	
R028	Transaction	The system shall accept only positive transaction amounts greater than zero.	High	Validation	Implemented	
R029	Transaction	The system shall not allow negative values in the transaction amount field.	High	Validation	Implemented	
R030	UI	The system shall display an appropriate validation message when the transaction amount is zero or negative.	Medium	Validation	Implemented	
R031	Transaction	The transaction amount field shall accept numeric values only.	High	Validation	Implemented	
R032	Category	The system shall not allow category names containing only whitespace characters.	High	Validation	Implemented	

Project Name	CashTrack
Version	1.0.0
Tester	Fathima Rubi
Test Started Date	23/06/2026
Test End Date	24/06/2026
Scope	Testing of Transaction and Category modules including add, display, delete, validation, persistence, and balance calculation functionalities
Out of scope	Performance testing, security testing, and compatibility testing on multiple devices
Environment	Device: Vivo Y29 Operating System: Android 16
Test Type	Manual Testing Functional Testing UI Testing Validation Testing Persistence Testing
Entry Criteria	Application is installed successfully, requirements are documented, and test cases are prepared
Exit Criteria	All high-priority test cases executed and no critical defects remain open
Risks	Testing performed on a single device, device-specific issues may not be detected

Test Scenario ID	Module	Description	Requirement ID	Priority	Risk Level
TS001	Category	Verify user can create an income category	R001, R002, R003, R004	High	High
TS002	Category	Verify user can create an expense category	R001, R002, R003, R004	High	High
TS003	Category	Verify category name is mandatory	R023, R025	High	High
TS004	Category	Verify the system displays all saved categories in the category list screen	R005	High	High
TS005	UI	Verify income category displays green visual indicator	R026	Low	Low
TS006	UI	Verify expense categories display red visual indicator	R027	Low	Low
TS007	Category	Verify user can delete an existing category	R006	High	High
TS008	Category	Verify category information is retained after application restart	R007	High	High
TS009	Transaction	Verify user can create an income transaction	R008, R009, R010, R011, R012, R013, R014	High	High
TS010	Transaction	Verify user can create an expense transaction	R008, R009, R010, R011, R012, R013, R014	High	High
TS011	Transaction	Verify transaction amount field validation	R024, R025, R028, R029, R030	High	High
TS012	Transaction	Verify the system displays all saved transactions in the transaction list screen	R015	High	High
TS013	Transaction	Verify transactions are sorted in descending order by date	R018	Medium	Medium
TS014	Transaction	Verify transaction date is displayed correctly	R019	Medium	Low
TS015	UI	Verify income transactions display green indicator	R026	Low	Low
TS016	UI	Verify expense transactions display red indicator	R027	Low	Low
TS017	Transaction	Verify user can delete an existing transaction	R016	High	High
TS018	Transaction	Verify transaction information is retained after application restart	R017	High	High
TS019	Transaction	Verify the system displays total balance using the formula: Balance = Total Income - Total Expense	R020, R021	High	High
TS020	Transaction	Verify balance updates when a transaction is added or deleted	R022	High	High
TS021	Transaction	Verify transaction amount field accepts numeric values only	R031	High	High

TS022	Category	Verify category name does not accept whitespace-only values	R032, R025	High	High
-------	----------	---	------------	------	------

Test Case ID	Test Scenario ID	Requirement ID	Module	Summary	Preconditions	Test Data	Test Steps	Expected Result	Actual Result	Status	Priority
TC001	TS001	R001,R002,R003,R004	Category	Verify user can create a valid income category	User should be in category adding screen	Category Name = 'Salary' Type = Income	1. Enter 'Salary' in 'Category Name' field 2. Select 'Income' 3. Click 'Add Category' button	The category is saved successfully and displayed in the category list.	The category is saved successfully and displayed in the category list.	Success	High
TC002	TS002	R001,R002,R003,R004	Category	Verify user can create a valid expense category	User should be in category adding screen	Category Name = 'Shopping' Type = Expense	1. Enter 'Shopping' in 'Category Name' field 2. Select 'Expense' 3. Click 'Add Category' button	The category is saved successfully and displayed in the category list.	The category is saved successfully and displayed in the category list.	Success	High
TC003	TS003	R023,R025	Category	Verify category name is mandatory	User should be in category adding screen		1. Don't enter any data in 'Category Name' field 2. Click 'Add Category' button	The category is not saved and an appropriate validation message is displayed.	The category is not saved and an appropriate validation message is displayed.	Success	High
TC004	TS022	R032, R025	Category	Verify category name does not accept whitespace-only values	User should be in category adding screen	Category Name = ' '	1. Enter space in 'Category Name' field 2. Click 'Add Category' button	The category is not saved and an appropriate validation message is displayed.	Category containing only whitespace was saved successfully and displayed in the category list.	Fail	High
TC005	TS004	R005	Category	Verify the system displays all saved categories	User should be in category listing screen	-	1. Check the screen displays all category names that added previously	The system displays all category names correctly	The system displays all category names correctly	Success	High
TC006	TS005	R026	UI	Verify income category displays green visual indicator	User should be in category listing screen	-	1. Check every Income category shows a green indicator	The system displays green indicator with all income category	The system displays green indicator with all income category	Success	Low
TC007	TS006	R027	UI	Verify expense category displays red visual indicator	User should be in category listing screen	-	1. Check every expense category shows a red indicator	The system displays red indicator with all expense category	The system displays red indicator with all expense category	Success	Low
TC008	TS007	R006	Category	Verify user can delete an existing category	User should be in category listing screen	Category Name = Salary	1. slide a category left to right 2. click the delete button	The selected category is removed from the category list.	The category removed successfully	Success	High
TC009	TS008	R007	Category	Verify category names retain after app restart	Categories have been created and the application has been restarted	-	1. Launch the app 2. Navigate to Category listing screen 3. Check all added categories are displayed	All previously added categories are displayed.	All previously added categories are displayed.	Success	High
TC010	TS009	R008, R009,R010, R011,R012, R013,R014	Transaction	Verify user can create a valid income transaction	User should be in the transaction adding screen	Purpose = May Salary Amount = 15000 Date = 05.06.2026 Type = Income Category = Salary	1. Enter 'May Salary' in 'Purpose' field 2. Enter '15000' in 'Amount' field 3. Select 'June 5, 2026' from the calendar 4. Select 'Income' 5. Select 'Salary' from Category drop-down 6. Click 'Add Transaction' button	The transaction is saved successfully and displayed in the transaction list.	The transaction is saved successfully and displayed in the transaction list.	Success	High
TC011	TS010	R008, R009,R010, R011,R012, R013,R014	Transaction	Verify user can create a valid expense transaction	User should be in the transaction adding screen	Purpose = Grocery shopping Amount = 500 Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Grocery shopping' in 'Purpose' field 2. Enter '500' in 'Amount' field 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is saved successfully and displayed in the transaction list.	The transaction is saved successfully and displayed in the transaction list.	Success	High
TC012	TS011	R024, R025	Transaction	Verify transaction amount is mandatory	User should be in the transaction adding screen	Purpose = 'Shopping from broadway' Amount = " Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Shopping from broadway' in 'Purpose' field 2. Leave the 'Amount' field empty 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is not saved and an appropriate validation message is displayed.	The transaction is not saved and an appropriate validation message is displayed.	Success	High
TC013	TS011	R028, R030	Transaction	Verify transaction amount does not accept zero value	User should be in the transaction adding screen	Purpose = 'Shopping from broadway' Amount = '0' Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Shopping from broadway' in 'Purpose' field 2. Enter '0' in 'Amount' field 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is not saved and an appropriate validation message is displayed.	Transaction with amount 0 was saved and displayed in the transaction list.	Fail	High

TC014	TS021	R031	Transaction	Verify transaction amount field accepts numeric values only	User should be in the transaction adding screen	Purpose = 'Shopping' Amount = 'hundred' Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Shopping' in 'Purpose' field 2. Enter 'hundred' in 'Amount' field 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is not saved and an appropriate validation message is displayed.	The transaction is not saved and an appropriate validation message is displayed.	Success	High
TC015	TS011	R029, R030	Transaction	Verify transaction amount field does not accept negative values	User should be in the transaction adding screen	Purpose = 'Shopping' Amount = '-100' Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Shopping' in 'Purpose' field 2. Enter '-100' in 'Amount' field 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is not saved and an appropriate validation message is displayed.	Transaction with negative amount (-100) was saved and displayed in the transaction list.	Fail	High
TC016	TS012	R015	Transaction	Verify the system displays all saved transactions	User should be in the transaction listing screen	-	1. Verify all added transaction is displayed in transaction list	Transactions are displayed correctly	Transactions are displayed correctly	Success	High
TC017	TS013	R018	Transaction	Verify transactions are sorted in descending order by date	User should be in the transaction listing screen	-	1. Verify transaction dates are in descending order(newest transaction shows first)	Transactions are successfully sorted in descending order by date	Transactions are successfully sorted in descending order by date	Success	Medium
TC018	TS014	R019	Transaction	Verify transaction date is displayed correctly	User should be in the transaction listing screen	-	1. verify every transaction shows a date	Transaction date is displayed for every transaction.	Transaction date is displayed for every transaction.	Success	High
TC019	TS015	R026	UI	Verify income transactions display green indicator	User should be in the transaction listing screen	-	1. Check every Income category shows a green indicator	The system displays green indicator with all income category	The system displays green indicator with all income category	Success	Low
TC020	TS016	R027	UI	Verify expense transactions display red indicator	User should be in the transaction listing screen	-	1. Check every expense category shows a red indicator	The system displays red indicator with all expense category	The system displays red indicator with all expense category	Success	Low
TC021	TS017	R016	Transaction	Verify user can delete an existing transaction	User should be in the transaction listing screen	Purpose = Grocery Shopping Amount = 500 Date = 07.06.2026 Type = Expense Category = Shopping	1. slide the transaction left to right 2. click the delete button	The selected transaction is removed from the transaction list.	The selected transaction is removed from the transaction list.	Success	High
TC022	TS018	R017	Transaction	Verify transaction information is retained after application restart	Transactions have been created and the application has been restarted.	-	1. Launch the app 2. Check all added transactions are displayed	All previously added transactions are displayed.	All previously added transactions are displayed.	Success	High
TC023	TS019	R020, R021	Transaction	Verify the system displays the calculated balance	User should be in the transaction listing screen	-	1. Ensure transaction list screen shows a balance amount separate from transactions	The system displays total balance	The system displays total balance	Success	High
TC024	TS019	R020, R021	Transaction	Verify the system displays total balance using the formula: Balance = Total Income - Total Expense	User should be in the transaction listing screen	-	1. Add all income amounts 2. add all expense amounts 3. detect total expense amount from total income amount 4. ensure the system shows the balance	System displays the correct total balance	System displays the correct total balance	Success	High
TC025	TS020	R022	Transaction	Verify balance updates when a transaction is added	User should be in the transaction listing screen	Purpose = 'Shopping from broadway' Amount = '300' Date = 07.06.2026 Type = Expense Category = Shopping	1. Click the add button 2. enter the data 3. Click 'Add Transaction' 4. Verify the transaction displayed in transaction list screen 5. Calculate balance by doing total income - total expense 6. Ensure the calculated balance = the balance that displayed in the transaction listing screen	The balance is updated correctly.	The balance is updated correctly.	Success	High
TC026	TS020	R022	Transaction	Verify balance updates when a transaction is deleted	User should be in the transaction listing screen	Purpose = 'Shopping from broadway' Amount = '300' Date = 07.06.2026 Type = Expense Category = Shopping	1. Find the transaction with given data 2. slide it from left to right 3. click the delete button 4. Verify the transaction removed from transaction list screen 5. Calculate balance by doing total income - total expense 6. Ensure the calculated balance = the balance that displayed in the transaction listing screen	The balance is updated correctly.	The balance is updated correctly.	Success	High

TC027	TS011	R024, R025	Transaction	Verify transaction amount field does not accept whitespace-only values	User should be in the transaction adding screen	Purpose = 'Shopping from broadway' Amount = ' ' Date = 07.06.2026 Type = Expense Category = Shopping	1. Enter 'Shopping from broadway' in 'Purpose' field 2. Enter a single whitespace in 'Amount' field 3. Select 'June 7, 2026' from the calendar 4. Select 'Expense' 5. Select 'Shopping' from Category drop-down 6. Click 'Add Transaction' button	The transaction is not saved and an appropriate validation message is displayed.	The transaction is not saved and an appropriate validation message is displayed.	Success	High

Failed	3
Blocked	0
Pass Percentage	88.89%
Total Defects	3
Critical Defects	1
Recommendations	The application's core Category and Transaction functionalities are working as expected. However, three validation-related defects were identified: - Category name accepts whitespace-only values. - Transaction amount accepts zero value. - Transaction amount accepts negative values. These defects should be fixed and retested before production release to ensure proper input validation and data integrity.
